

As more vehicles come equipped with Advanced Driver Assist Systems (ADAS) a specialized inspection and/or calibration may be needed during the lifetime of the vehicle.

These systems include but not limited to the following:

- Rear camera
- Rear parking sensors
- 360 camera systems
- Blind spot detection
- Lane departure warning
- Adaptive cruise control
- Collision warning
- Lane keep assist
- Backup Assist
- Autonomous driving function

These needs fall outside the scope of inspection for the Generic Condition Report due to the nature of both detection and troubleshooting being mechanical.

Due to safety concerns, the NAAA Auction Standards Committee recommends any/all ADAS related concerns be investigated by a qualified 3<sup>rd</sup> party (as determined by Auction company representative) outside the auction property.

All costs including transportation to and from location, diagnosis and any/all repairs or replacements will be responsible by seller and/or buyer depending on the outcome of the 3<sup>rd</sup> party's diagnosis.

The timelines for Arbitration will fall under the following:

Sales Channel	Green Light Only	Yellow Light Only	Red Light Only
In-Lane	Day of sale by close of business	No Arbitration	No Arbitration
Online	2 days within verified receipt of the vehicle not to exceed 10 days from sale date	No Arbitration	No Arbitration
